## Yamaha cvp 809 uk

The flagship model of the CVP series, with almost the same expressiveness as a grand piano. More realistic voice and diverse array of support results in superb ensemble performance. The flagship model of the CVP-809 CVP series, with the semantics of a grand piano, and hundreds of other instrument voices are also available. CFX and Bösendorfer Imperial Piano Samples, CFX Binaural Sample GrandTouch™ Keyboard with Counterweight, 88-Key Linear Graded Hammers GP Response Damper Pedal 1,605 Voices + 58 Drum/SFX Kit + 480 XG Voices 675 Styles (40W + 30.2 + 20W) x 2 + 80W (16cm + 5cm + 2.5cm (dome)) x 2 + 20 cm (dome)) x 2 + 20 cm speaker system, Spruce Kon Speaker, Twisted Flare Port TFT Color LCD (Touch Screen), 9.0 inch 800 x 480 dots built-in Bluetooth® audio iOS app smart pianist integration (song function only) Find a wide variety of support styles available from October 2019 the CVP series offer lots of non-piano voices as well as band and orchestra accompaniment in a wide range of genres including piano jazz and pops... Play your favorite tunes as they are written, or try your hand at the arrangement — the next catchy arrangement is just waiting for it to be searched. Sing, compose and explore the limitless possibilities of CVP series CVP series Piano are ideal for people who want to sing, compose and enjoy music in new ways to satisfy their appetite. Plug in and sing in a microphone- the CVP series provide piano harmonic support. Or, use a multitude of convenient functions to compose to create your own original support. CVP series piano inject a lot of fun in time with family and friends. Key features of the CVP series-Yamaha's finest concert grand piano-and Bösendorfer's legendary Imperial, CVP series Klavanova has a sound palette that's simply stunning-the features of incredible voices from CFX-Yamaha's finest concert grand piano have the finest piano features. Every key has been sampled individually, and thanks to binaural sampling techniques, the CVP series also provides a fully immersive concert grand piano experience when using headphones. This fantastic sound has been paired with grandtouch keyboard, which allows pianists to play with subtle dynamics through the full range of tools, and faithfully reproduce individual differences in the weight and return of each key. The flagship CVP-809 and CVP-809GP also feature counterweights that give them a great touch similar to a grand piano, with the subtle delicacy required when using techniques such as pianissimo. Playing with genres featuring a wide array of support styles, the CVP series allows you to enjoy great-sounding performances with polished introduction and end, providing authentic accompaniment that will enhance your game in a diverse range of music genres. In the CVP-800 series, these accompaniments come with dramatically improved sounds, enriching your performance. Band The dive in CVP-800 series boasts stunning spatial acoustics and ensembles So realistic that you can almost feel the presence of other artists around you. Reproducing in perfect detail from each instrument voice breathable saxophone to ringing guitars and warm, resonant strings, the CVP series features an impressive collection of natural instrument voices. Thanks to the acclaimed super expression technology, the distinctive features of each tool are reproduced in incredible detail as you play. The flagship model CVP-809/809GP features all new samples especially for instruments such as electric piano, strings, and drums, delivering sound quality that can be heard to believe. Enhanced authenticity distorted guitars, rotary speaker organs, subtle variations for ethereal strings..... This CVP delivers on all fronts with unprecedented levels of realism. It reproduces subtle variations that occur even when the most skilled drummer plays, so you feel like you're performing with a human drummer in a live band. Features Connect a microphone with Klövova to your Klavanova to make it more enjoyable and enjoy fun and inspiring karaoke features. The CVP series can mute vocals of songs from your audio music library, and you can watch \* song songs on lcd screen and change the speed and pitch of the songs themselves. The CVP-800 series will also add natural harmony to your voice as you sing. \* Song performance is only available when audio includes song data guide lamps and touch panels, which experience more intuitive games from the Yamaha MusicSoft online store and a more intuitive game experience for practice songs and guide lamps for practice songs, which prompts keys to play while bouncing on the screen after ball scores. If you want to do this, Klavova will also talk to you! When the voice guide is activated, Klavova speaks information from the current performance or operation being performed. It allows people who have visual impairment to enjoy the instrument. Note:- When using voice guide, make sure the USB flash memory with voice guide files is attached to the device. - Audio information of functions/screens supported by voice guide is limited. Enjoy listening using Kinova's built-in Bluetooth interface with built-in Bluetooth® audio play with your favorite music, or just through CVP's high-quality speakers. Play your favorite songs instantly smart pianist Yamaha is a free application for use with digital piano that can analyze any commercially available songs you have. On the CVP series, it has an audio to score function that automatically creates piano compatible scores. This one application will help you enjoy life with your piano. \* The Android version currently offers CVP-800 series sound two world-class concert grands Yamaha CFX in a digital piano, not compatible with our flagship 9' concert Grand Piano, sparkling highs and one A sound that reaches the resonant bass with projects to remove access to any concert hall. Bösendorfer Imperial is a piano known in its long history for its classic Viennese sound. Both are characterized by excellent piano strength, versatility, subtlety and distinctive traits of lightness. Both are found only in a Klavova digital piano. VRM physical modeling- A concert in a grand piano echoes the distinctive echo generated by the whole body of the grand piano, resonating throughout the body of sound equipment, which covers the listener in sound. This phenomenon is completely reproduced in Klavova through enhanced virtual resonance modeling (VRM). It calculates different states of wire for each of the 88 notes on the keyboard, from one moment to the next, and pressed the time and depth of the sponge pedals. This technique allows for vivid, bright, largely diverse expressions that reflect the limitless number of factors inherent in piano performance. From Staccato to Leggetto—the wonderfully expressive sound that responds to the player's touch featuring Yamaha smooth release technique, Clavanova provides the crisp tone heard while playing Staccato as well as the dull sound produced by releasing keys and more. It provides a fine-subtle response to the pianist's game. Smooth tonal changes perfectly match the dominant pressure sound in an acoustic piano that is long eroded. Pianists can change the volume of sound- as well as its dynamics - only to achieve both melodic and bright tones by changing the pressure applied to the keys. Clavanova has long, meticulous sample recordings of notes on the piano, which reproduces them in rich detail and uses unique Yamaha technologies to achieve smooth tonal transitions in response to the player's touch. Additionally, Clavanova has been repeatedly tested and adjusted by many pianists to feel similar to a grand piano. Key-off sketches the moment a pianist's fingers are raised from the keys of a grand piano, subtle changes are in the tone of the instrument as the sponge is low on the stars to mute its sound. Key-locked samples have actual recordings of these changes, offering faithful reproduction of the most subtle changes to the sound of the piano, allowing for more realistic performance. A fully immersive concert grand experience- even cfdx with headphones Yamaha's advanced binaural sampling technique, uses samples of Yamaha's acclaimed concert grand piano, recorded with special microphones that capture spatial information and other nuances understood by the human ear. The resulting sound is very natural, so enveloping, that you'll soon forget you're also wearing headphones at all. Once you choose Yamaha CFX Grand Voice and put headphones on, the binaural sample sound is automatically ready and no additional settings are required. Now with or without headphones, you can Enjoy the grand experience of concerts at home. Stereophonic Optimizer- A new type of headphone experience when using headphones, Stereophonic Optimizer lets players enjoy pedal sound sitting in front of the acoustic piano. With stereophonic optimizer, sample voices from acoustic piano\* appear to come from the body of the instrument. It provides a comfortable, natural experience that overcomes performance gaps with headphones. \* CFX voice binoral sampling technology uses touch and concert grand piano craftsmanship built on the legacy of grand piano keyboards featuring a light feel when played slowly, and played with more strength when a heavy feeling. In contrast, a non-grand piano keyboard has a similar resistance, regardless of whether the player uses a gentle or heavy touch. It has traditionally been one of the most important differences between the touch of a grand piano and a digital piano. However, when developing GrandTouch keyboard action, Yamaha sought to reproduce the unique true key resistance to the Grand Piano with greater fidelity. The result is a tool with a more responsive touch, providing a more dynamic range than ever. Now you can experience a much more controlled, subtle sound when playing slowly, or powerful, brighter tones when playing with a strong touch — just like a grand piano. Get true balance pianists not only prefer the way they sound because of the grand piano, but also the way keys respond to their touch. When the grand piano keys are struck, there is a certain weight or resistance to the touch. Similarly, when keys are released, they return to a state of rest depending on the balance between the key and the internal mechanics of the keyboard. Due to differences in mechanics, it is difficult to reproduce the natural return of the keys of a grand piano in digital piano. Yamaha carefully studied these features when developing Grandtouch Keyboard, and has now reintroduced this fine balance in The Klavanova Digital Piano. The result is GrandTouch - detailed grand piano sounds that allow for a similar tone control, precise rhythm and smooth melodic expression - fundamental to an exceptional musical performance. Take advantage of your artistic expression while playing digital piano, the back area of the keys can prove to be a challenge to full musical expression. This is because the pursuit of the key is closest to the base of the action. The closer to this pivot point is that you strike the key, the less leverage you have and the more power you need to implement. The greater length of the grandtouch key allows the player to take more advantage, which also allows better meaningful control over the back of the keys. This is the same support length found on the Yamaha S3X Premium Grand Piano (as of April 2017), and the longest support length used on any digital piano. We haven't given any detail slides are more Compared to what we think, and for pianists, the texture of the piano key is extremely important. Grandtouch Keyboard has white keys made of the highest quality synthetic ivory, independently developed by Yamaha. Black keys are eliminated in synthetic ebony. Synthetic ivorytops reproduce the tactile surface of the real ivory keyboard used in old acoustic pianos. It has highly absorbent material that prevents the fingers from sliding even after hours of practice, while maintaining the ideal texture and feel. Resulting in well over a century of experience in making acoustic pianos, this particular Yamaha technology receives a finish that feels natural and comfortable. In addition to feeling, the appearance and fine texture of these keys is unmatched by any other digital piano, and is sure to inspire pianists from the moment they experience it. The escapement mechanism of the Kinova keyboard quickly takes the escapement mechanism hammers into a grand piano away from the wires after striking them to prevent any interference with string vibrations. This mechanism creates a slight clicking sensation when the keys are pressed slowly. Since Real Grand Expression offers players fantastic sound, touch and paddling, we decided to create an escapement that offers excellent play ability, repetition and feedback without hampering performance. The Klavanova keyboard has an escapement mechanism that reproduces this sensation near the bottom of the major dip. They are designed in such a way that the click is only direct at the most lightweight keystrokes, similar to the keyboard of a grand piano. These keyboards have been adjusted to provide additional friction that balances key repetition and response without interrupting performance. 88-key linear graded hammers - The first digital piano keyboard is never yielded every single key differently on a grand piano keyboard to feature realistic loads on every key. This is because the strings for each note are slightly thinner and lower in the treble register, becoming thicker and longer towards the bass register. The 88-key linear classified hammers of Clavinova is the first of its kind to faithfully duplicate this classified touch with different weights and key return on each one of its keys. It results in a feel and feedback that's stunning like a grand piano, and allows players to gain a more authentic touch to appreciate. The main counterweight counters are embedded in the keys of a grand piano to balance the weight of hammers and provide more precise control when playing delicately in small amounts. Clavanova features carefully adjusted counterweight and better key return in the fast way for better play ability while playing Pianisimo with a light touch. Clavanova's keyboard has been fine to provide optimal balance, emphasizing its superb play ability and grand piano response. GP Response Damper Offers an authentic grand piano The use of sponge pedal is essential to provide pianists with all the necessary expressive instruments to easily change the nature of a piano's sound sounds and express their musical vision. Kleinova Digital Piano has a sponge pedal that constantly detects the depth of depression and allows halfpeddling, which lets players pedal depression and return, changing the depth and character of their piano sound. The high-end model GP Response Trampler Pedal, which offers a grand piano-style resistance curve, features light starting to the touch and heavy-moving as the pedal is further gloomy. This allows players to become accustomed to the nuances of delicate paddling. More features Take steam wirelessly with Bluetooth® audio You can play music through the audio system on Klavova using a Bluetooth-enabled smart device. Enjoy playing with any song on your smart device as you stream mp3 files like audio. The recording function featured in multi-track song recorder Klavanova Digital Piano allows you to record your performance\* with one touch, which is useful when you want to do an unbiased review of your game. Additionally, you can record 16 tracks for simultaneous playback, so different hands can be recorded different or overdub parts with different voices. \* Recording is saved in MIDI format, and can also be recorded in USB flash memory. Playback of recorded data on the computer requires compatible software. USB Audio Recorder create record display and audio files for USB flash memory \* You can save and play back on the computer, share with friends or create A CD. \* Data WAV or mp3 format is saved in USB connectivity Connect Klavanova to computer or USB memory device to manage your library.
